SCOPE OF WORK

Design new MEP systems for 4,000 sq. ft. restaurant

PROJECT DESCRIPTION

Owner of Mantra Restaurant decided to renovate this property. In addition to general dining area of a traditional restaurant the new restaurant will have a bar with lounge & private dining area for meeting. A&J Consulting designed renovation of mechanical, electrical, plumbing and fire protection systems. An exclusive plumbing system was designed for the kitchen including kitchen hood. Special considerations were made to provide required air-conditioning and protection to the space, and still maintain the aesthetics of the building.
